Table of Contents

List of Figures	X
List of Tables	XII
1 Introduction	14
1.1 Text and chapter architecture	14
1.2 What is educational technology?	15
2 Foundations I: learning theory	19
2.1 Learning theory	20
2.1.1 Overview	20
2.1.2 Behaviorism	21
2.1.3 Cognitivism and human information processing	22
2.1.4 Constructivism	23
2.1.5 Connectivism	25
2.2 Learning domains, levels and style	26
2.2.1 Learning domains	26
2.2.2 Learning level and type	27
2.2.3 Learning style	30
2.3 Metacognition, reflection and learning strategies	33
2.4 Human information processing and constraints	35
2.4.1 Cognitive load theory	35
2.4.2 Cognitive ergonomics, usability and HCI	37
2.5 Summary and conclusion	39
3 Foundation II: pedagogy	42
3.1 A very short history of instructional design theories	43
3.2 Pedagogic strategies and methods	44
3.2.1 Families of pedagogic strategies	44
3.2.2 Pedagogic methods/tactics	47
3.2.3 Analytic dimensions to describe pedagogic strategies	47
3.2.4 Conclusion	51
3.3 Instructional design models and methods	51
3.4 Non-pedagogical strategies and technology	52
3.5 Conclusion	53
4 Foundations III: communication and affect	54
4.1 Computer-mediated communication	55

4.2	Theory of computer-supported collaborative learning	57
4.3	Motivation and affect.....	61
4.3.1	Engagement	64
4.3.2	The ARCS instructional design model	65
4.3.3	Gamification	66
4.4	Summary and conclusion	68
5	Foundations IV: digital literacies and 21st century skills.....	69
5.1	Digital learner competences	73
5.2	Teacher and designer competence	76
5.3	Summary and conclusion	78
6	Technologies in education	80
6.1	A short history of educational technology	81
6.2	Delivery methods	82
6.3	Hardware and software evolution	84
6.3.1	Digital devices	84
6.3.2	From construction kits and models to digital design and fabrication	85
6.3.3	Software evolution.....	86
6.3.4	The web as main software delivery platform.....	87
6.4	Mobile and flexible learning	90
6.4.1	Affordances of mobile technology for new pedagogies	91
6.4.2	The “apps” evolution.....	94
6.4.3	The future of mobile learning.....	95
6.5	The media debate	95
6.6	Open educational resources	98
6.7	The role of standards	100
6.8	The future of e-learning	103
7	EdTech 1: overview	104
7.1	7.1 Types of educational technologies.....	105
7.2	Learning I models and technology	110
7.3	Learning II models and technology	111
7.3.1	A note on concept learning.....	112
7.3.2	Guided discovery learning	114
7.3.3	Inquiry-based learning.....	115
7.3.4	Problem-based learning.....	115

7.3.5	Simulation and gaming.....	116
7.4	Learning III models and technology.....	118
7.4.1	Project-based learning	120
7.4.2	Project methodology-based learning.....	121
7.4.3	Case-based learning	122
7.4.4	Summary of learning III designs and project-oriented models.....	122
7.5	Conclusion and summary	123
8	EdTech 2: methods and design tools for sequencing.....	124
8.1	From programmed instruction to mastery learning.....	125
8.2	Sequencing of e-learning bricks.....	126
8.3	Learning design tools.....	127
8.3.1	Compendium LD	129
8.3.2	Tables	130
9	EdTech 3: contents	132
9.1	Learning objects in e-instruction	133
9.1.1	The learning object.....	133
9.1.2	E-learning content standards	135
9.1.3	E-learning authoring environments.....	135
9.2	Structured textbooks	136
9.2.1	Electronically delivered textbooks.....	136
9.2.2	Pedagogically structured e-books.....	138
9.2.3	Interactive textbooks	139
9.3	Hypertext	140
9.3.1	Hypermedia genres used in education	142
9.3.2	Hypertext design guidelines.....	144
9.3.3	Cognitive flexibility hypertext.....	146
9.3.4	Towards pedagogically designed hypertext.....	148
9.4	Wikis.....	148
9.5	Multimedia animations.....	150
9.5.1	Multimedia authoring environments.....	151
9.5.2	Design principles for multimedia animation	152
9.6	Concept maps.....	153
9.6.1	Kinds of concept maps and software.....	154
9.6.2	Concept maps in education.....	155

9.6.3	Mind maps.....	157
9.7	Educational audio, video and screen casts	158
9.7.1	Audio and video software and formats.....	159
9.7.2	Screen casts	159
9.7.3	Use of educational videos.....	160
9.7.4	Videos in MOOCs.....	161
9.8	Conclusion and outlook	164
10	EdTech 4: interactive learning contents and environments	166
10.1	The concept of interactivity and interactive multimedia.....	166
10.2	Computer-based training	169
10.3	Microworlds.....	170
10.3.1	Example: AgentSheets.....	173
10.3.2	Example: the GenScope, BioLogica and Geniverse	175
10.4	Simulation.....	178
10.4.1	Pedagogical effectiveness of simulations	181
10.4.2	Example: SimQuest	182
10.4.3	Example: PHET simulations	183
10.4.4	Example: Go-Lab	184
10.4.5	Example: NetLogo	185
10.4.6	System dynamics.....	187
10.5	Augmented, virtual and mixed reality	188
10.6	Business gaming and simulation.....	188
10.6.1	Markstrat.....	189
10.7	Game-based learning	191
10.8	Intelligent tutoring systems	197
10.8.1	A short introduction to expert system technology.....	198
10.8.2	History and discussion	199
11	EduTech 5: computer-mediated communication and collaborative learning	202
11.1	General CMC technology.....	203
11.1.1	E-mail, mailing lists, and forums	203
11.1.2	Chats, instant messaging and microblogs.....	204
11.1.3	Groupware and CSCW.....	206
11.1.4	Blogs.....	207
11.1.5	Virtual environments.....	209

11.2	Interaction forms in mainstream e-learning.....	212
11.2.1	Interactive teleteaching.....	212
11.2.2	E-tutoring.....	213
11.2.3	E-moderation	213
11.3	Knowledge construction environments	215
11.4	CACL scripts	217
11.4.1	The ArgueGraph script example.....	219
11.5	Social software and social computing	220
11.6	Conclusion	229
12	EduTech 6: tools for integration.....	230
12.1	Frameworks to look at integrated learning environments.....	231
12.2	Classroom technology	232
12.2.1	Espaces numériques de travail	233
12.2.2	CoolModes	234
12.2.3	Graasp open platform (DOIT).....	235
12.2.4	Adventure Academy, ABCMouse and Starfall	235
12.3	Learning management systems.....	237
12.4	MOOCs.....	240
12.4.1	MOOC platforms.....	241
12.5	Designing scenarios for web 2.0 technologies.....	242
12.6	Campus portals	244
12.7	Organizing materials and information – repositories	244
12.8	Home-made activity portals	245
12.9	Workflow systems	248
12.9.1	The LAMS system	248
12.9.2	FROG	249
12.9.3	Business process modeling systems.....	250
12.10	Learning e-portfolios	252
12.11	Conclusion integration tools.....	255
13	EdTech 7: productivity tools.....	257
13.1	Cognitive tools	257
13.2	Personal learning environments	262
13.2.1	The Epsilen framework	262
13.2.2	Elgg	263

13.2.3	Home-made environments with webtops	264
13.2.4	Conclusion	265
14	EduTech 8: student follow-up and assessment.....	267
14.1	Scaffolding, mentoring and coaching	267
14.1.1	The concept of scaffolding	268
14.1.2	Coaching and mentoring	269
14.2	Learning analytics and student tracking tools.....	270
14.2.1	Learning analytics.....	270
14.2.2	Student tracking tools in learning management systems.....	273
14.2.3	Use of general-purpose web analytics tools	274
14.2.4	Learning process analytics	274
14.3	Assessment tools.....	277
14.4	Towards more informed teaching and learning?.....	278
15	EdTech 9: technical standards and formats	280
15.1	Overview of major educational technology standards	280
15.2	Computer science design languages and formalisms	283
15.2.1	UML – the Unified Modeling Language	284
15.2.2	The XML formalism	285

1 Introduction

This course unit aims to provide an introduction to the field of educational technology. Educational technology can be defined as a design science or as a collection of different research interests addressing fundamental issues of learning, teaching, and social organization. Educational technology as a design science relies on and influences other academic disciplines, in particular the so-called learning sciences and instructional design theory (didactics).

Learning goals

- recall conceptual foundations, in particular some principles from learning theory and instructional design and how they interact with educational technology
- gain a global picture of the field
- understand various strands of development, research and practice
- describe major educational technologies and the contexts in which they are being used
- map technologies to instructional design goals

1.1 Text and chapter architecture

This text contains four series of chapters:

1. **Introduction and conceptual foundations:** We start with an introductory chapter that aims to define the field of educational technology, followed by chapters on its conceptual foundations (learning theory, pedagogy, and digital literacy) and an introductory chapter on technology in education.
2. **Educational technologies:** Educational technologies will be introduced through several chapters. The first “edTech” chapter summarizes the following edTech chapters. Each of these presents and discusses a set of technologies in more depth.
3. **Research and organizational issues:** We shortly will discuss research and development methodology as well as innovation and change management issues.
4. **Conclusion, glossary, and index:** The conclusion includes some tables that can be used for revision or taking design decisions. The glossary includes definitions of some important terms. The index will help you find concepts and major authors.

The following mind map summarizes this organization:

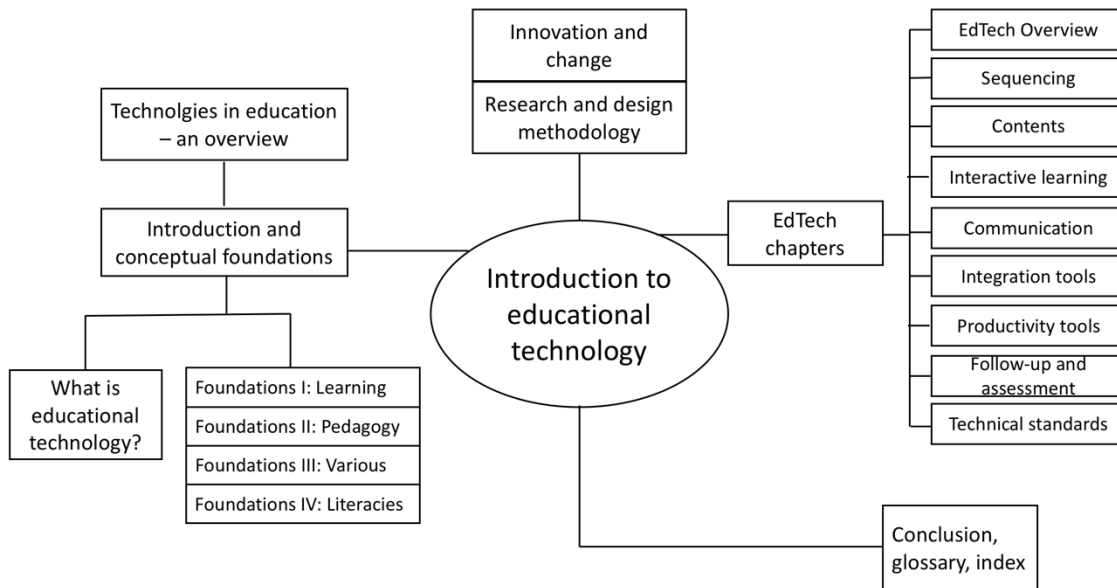

Figure 1: Mind map: Introduction to educational technology

1.2 What is educational technology?

Educational technology is concerned with the use of technology in order to improve education. It is a wide field. Therefore, one can find many definitions, some of which are conflicting. Educational technology can be considered either as a design science or as a collection of different research interests addressing fundamental issues of learning, teaching, and social organization.

Nevertheless, most researchers and practitioners might agree on a few features (of educational technology):

1. Use of technology is principled: Using technology means the systematic application of scientific knowledge to practical tasks. Therefore, educational technology is based on theoretical knowledge drawn from different disciplines (communication, education, psychology, sociology, philosophy, artificial intelligence, computer science, etc.) plus experiential knowledge drawn from educational practice.
2. Educational technology aims to improve education. Technology should facilitate learning processes and increase performance of the educational system(s) as it regards to effectiveness and/or efficiency.

This short introduction will try to give a preliminary definition of the field.

As a design science, educational technology looks at complex multidimensional processes involving people, procedures, knowledge, technical devices, and organizational structures. Finding solutions to various problems of learning and teaching implies a process of design, implementation and management and finally evaluation.

**Educational
technology as a
design science**
